		GP details	Kingsway Family Practice, 102 Oak View, Kingsway, KW2 5TT, (01234) 445566

Dear Dr. Desai,

Diagnoses:
Raised PSA (6.8 ng/mL)
Prostatic enlargement

History
Mr. White attended following PSA rise from 4.2 to 6.8 ng/mL in 12 months. Mild LUTS present (weak stream, nocturia x2). No haematuria. No family history of prostate cancer.

Examinations
Digital rectal exam: Prostate moderately enlarged, firm, no nodules felt.

Investigations to date
PSA: 6.8 ng/mL
Renal function: eGFR 85 mL/min.

Clinical summary
Given raised PSA and prostate findings, recommend TRUS biopsy to exclude malignancy.

Allergies and adverse reactions: NKDA.

Changes to medications and medical devices

None.

Actions for healthcare professionals

- Arrange TRUS biopsy within 2 weeks.

Actions for patient or their carer

- Avoid strenuous activity for 48 hours post-biopsy.

Information and advice given

Provided prostate biopsy information sheet and discussed risks/benefits.

Yours sincerely,

Dr. Michael Chen

Consultant Urologist

Date: 11/06/2025 Time: 15:40
